CGPA: **9.0**

TECHNICAL SKILLS

Languages: C, C++, Python, Java, HTML/CSS, Javascript, ReactJS
Graphics: Adobe Photoshop, Blender

PROJECTS

1. Bus Tracking System:

A group project where I was one of the four people who developed a bus tracking system as a part of an internally funded project. I contributed on the database design, hardware assembly and server connections.

2. Company Placement Portal

A company placement portal was developed by me using Netbeans in java by the use of various swingx elements and a database.

3. Bus Ticketing System

I implemented a bus ticketing system by using data structures like queue which was done using C.

VOLUNTEER WORK AND ACCOMPLISHMENTS

- Highest marks in Computer Science in 12th.
- Volunteered for a Computer Science for Police Workshop where I helped the police to learn the basics of coding in Shell, Python, SQL.
